SUMMARY

Mathematics and Statistics graduate (University of Warwick, 2026) seeking an entry-level Data Analyst role. Freelance data analyst for three Malaysian university research clients: reconciled RM 28.8 million of records to source, matched 1,637 papers to a 114-academic staff list and benchmarked a department against 24 peer units. Every number traces to source.

EXPERIENCE

Freelance Data Analyst (research clients) Sep 2026-Present
Clients: UiTM (INPRES, Faculty of Chemical Engineering), UPM (SPERC, Chemical & Environmental Engineering)

- **Research portfolio audit (UiTM):** reconciled 1,773 records for seven researchers (185 grants and 238 consultancy projects, RM 28.8M) to source; caught a 35% overstatement of indexed papers (603 vs 447).
- **Faculty research profile (UiTM):** matched 114 academics to 1,637 Scopus papers (cross-checked with Web of Science), removed duplicates and set one-credit-per-paper rules; delivered an Excel evidence base and interactive report.
- **Department benchmark (UPM):** compared 31 academics with 24 Malaysian and regional peer units on papers per academic (3.05 a year) and top-journal share (78% Q1+Q2); excluded units lacking staff counts.
- **Research-centre database (UPM SPERC):** merged 3,312 publication rows plus grants, awards and consultancy into one database and dashboard; deduplicated to 565 unique recent papers for a 2027-2030 strategic plan; scored all 50,388 possible seven-person teams on a national assessment to pick the strongest.
- **Faculty achievements record (UiTM):** turned 516 social-media posts into 74 verified achievements for the Dean, pulling the full data through the page's own API.

PROJECTS

Malaysia Household Income After Inflation 2026
Own project | SQL (SQLite), Python, DOSM open data | fariserhan.github.io

- Joined household income surveys to each state's price index to compare real income growth across 16 states; the leader depends on the start year (Terengganu +25.4% from 2016, Selangor +16.9% from 2019).

Job Application Tracker and BI Warehouse 2026
Own project | Python, SQL (dbt, DuckDB), Streamlit | github.com/Fariserhan/job-application-tracker

- Reads Gmail, keeps a dated history for every application and reports from one set of SQL definitions to an app, Excel and Power BI/Tableau exports; 240+ automated tests; unknown dates stay blank, never guessed.

EDUCATION

University of Warwick, BSc (Hons) Mathematics and Statistics (2:2) 2023-2026
Top marks: Intro to Statistical Modelling 88, Python for Data-Analytic Tasks 84, Programming for Data Science 75, Machine Learning Frameworks 74, Visualisation & Communication of Data 73
Coursework project: Poisson and negative-binomial GLMs in R on Danish mortality data (1996-2015), attributing 6.45% of deaths to diabetes.

Kolej MARA Banting 2021-2023
IB Bilingual Diploma 41/45 | HL: Business Management 7, Mathematics AA 6, English B 6

MRSM Tun Ghafar Baba | SPM 2020: 9 As (6 A+) incl. Maths, Add Maths, English, Chemistry 2019-2020

SKILLS

Data: SQL (working knowledge: joins, CTEs, window functions), Python (pandas), R (dplyr, ggplot2), Excel (pivot tables, lookups), data cleaning and reconciliation, Git/GitHub
BI & statistics: Power BI (learning), Streamlit, regression, GLMs, hypothesis testing; AI tools (Claude, Codex) with every output checked against source
Languages: English (IELTS 8.0, CEFR C1), Malay (native)

ACTIVITIES

Badminton (2023-2026): Warwick Statistics Society team, league champions 2023 (the society's first sports title); 24-hour charity tournament for Acorns Hospice.
