SUMMARY

Mathematics & Statistics graduate (University of Warwick, 2026) targeting entry-level Data Analyst and BI Analyst roles. Freelance research-data analyst since September 2026: audited 1,773 records worth RM 28.8 million, built a database and dashboard for a 19-member research centre, and built a star-schema BI warehouse with 131 tests and matched Power BI and Tableau measures. Every number traces to source.

EXPERIENCE

Freelance Research Data Analyst Sep 2026-Present
Clients: INPRES (UiTM), UiTM Faculty of Chemical Engineering, SPERC (UPM) | Python, Excel, OCR, APIs

- **Research portfolio audit (UiTM):** reconciled 1,773 records for seven researchers to source (185 grants, RM 14.22M; 238 consultancy projects, RM 14.56M; 1,257 publications; 93 supervisions); caught 4 source defects before delivery, incl. a 35% overstatement of indexed publications (603 claimed vs 447 verified).
- **Research-centre analytics (UPM):** built a database and dashboard for a 19-member centre (968 Scopus papers, 35,281 citations, RM 15.8M grants), benchmarked it against 8 peer universities and scored all 50,388 possible teams of seven on the national HICoE instrument to pick a submission team.
- **Faculty activities record (UiTM):** turned 516 social-media posts into 74 verified achievements for the Dean under strict inclusion rules (multi-tagged records cut from 317 to 111); 27-slide deck and 5 spreadsheets, with full data recovered via the page's own GraphQL API (169 paginated responses).

PROJECTS

Recruitment Analytics Warehouse & BI Platform 2026
Independent | Python, SQL, Power BI, Tableau | github.com/Fariserhan/job-application-tracker

- **One metric definition, four outputs:** star-schema warehouse with repeatable ETL and one shared SQL metric library feeding a Streamlit dashboard, Excel exports and matched Power BI (DAX) and Tableau measures, so every surface reports the same figure.
- **131 unit tests** across 8 modules; Gmail API ingestion with a rule-based noise classifier; funnel benchmarked against published hiring rates; unknown dates stay NULL, never imputed.

Machine Learning Coursework (Warwick) 2024-2026
Python, PyTorch, scikit-learn | group and individual projects

- Built a CNN image classifier and a WGAN image generator on MNIST and CIFAR-10 (group project); recovered hidden cluster parameters with Gaussian-mixture EM and PCA; forecast global GDP and population to 2050 in a 5-person team (CAGR projections).

EDUCATION

University of Warwick, BSc (Hons) Mathematics and Statistics (2:2) 2023-2026
Top marks: Intro to Statistical Modelling 88, Python for Data-Analytic Tasks 84, Programming for Data Science 75, Machine Learning Frameworks 74, Visualisation & Communication of Data 73

Kolej MARA Banting 2021-2023
IB Bilingual Diploma 41/45 | HL: Business Management 7, Mathematics AA 6, English B 6; SL: Economics 7, Environmental Systems & Societies 7

MRSM Tun Ghafar Baba | SPM 2020: 9 As (6 A+) incl. Maths, Add Maths, English, Chemistry 2019-2020

SKILLS

Data & SQL: SQL (joins, CTEs, window functions; SQLite), star-schema modelling, repeatable ETL, data cleaning & reconciliation, API and OCR data extraction
Programming: Python (pandas, NumPy, scikit-learn, PyTorch), R (dplyr, ggplot2), Git/GitHub, AI-assisted analysis with verification checks
BI & Statistics: Power BI (DAX), Tableau, Excel, Streamlit; regression, GLMs, PCA, clustering | **Languages:** English (IELTS 8.0, CEFR C1), Malay (native)

ACTIVITIES

Badminton (2023-2026): Warwick Statistics Society team, termly league champions 2023 (the society's first sports title); Warwick Badminton Club tournaments incl. a 24-hour charity event for Acorns Hospice; Malaysian Games (MGames) Manchester, doubles.
